Biotopeexkursion - Zur Frauenschuhblüte ins Gadental

🕒 Sunday 9:30 o'clock

Excursion to Gadental - nature reserve, Natura 2000 area as well as biosphere park core zone.

Description

The Gadental valley is home to primeval forests with plenty of dead wood. There are also rare forests, such as the species-rich Spiraea forests, which are home to a variety of orchids, including the rare lady's slipper. The interconnectedness of the habitats from the alpine level down to the valley can be seen in the alternation of primeval forest-like woods and semi-natural grasslands in the avalanche paths.

The speaker is Günter Bischof, botanist and hiking guide.

Price

free of charge as part of the Vorarlberg biotope excursion program

Meeting point

09:30 | Buchboden church, here formation of carpools to the parking lot Rothenbrunnen

Anmeldung

until 28.05.2025 12:00 directly at info@grosseswalsertal.at or T +43 5554 20010

Level of difficulty

Walking time: approx. 3,5h | difference in altitude: 407 Hm | approx. 5 hours in total

Venue

Kirche Buchboden
